Additional Notes: For this month the ponds are doing well and I have not sprayed anything in them. I have started doing around the perimeter of a few of them for tall weeds starting to come up and high weeds. Mostly have been spaying all the outfalls to make sure the water is flowing out and nothing is blocked along with trying to get all trash in or around out of them. Looks like we are not having as much problems with new growth or algae but im sure the rainfall and heat will start to require more maintenance as the summer time is usually when we have most of our problems.
