TOTAL ACRES		0.7	Total size (in acres) of all foliage maintenance areas		
AVG. TREATED ACRES			Average infested foliage treated area is roughly 20%		
<b>Additonal Notes:</b> This month as far as mitigation we are continuing with checking areas treated and extending the areas where there is more growth further back into the woods. Spraying this moth has been hard with all the wind so we have been cutting a lot and going back to spray when the weather is good. There is a lot of fern deep into the woods which is why it is so hard to even access to be able to treat.
